

BUSINESS DEVELOPMENT MANAGER

Founded by industry veterans, Eatron Technologies is a software start-up (backed up by VC) focusing on electrification and autonomy, serving the global automotive market. With research and engineering offices at Warwick / UK and Istanbul / TR, we are growing our teams to develop cutting edge solutions and software for battery management, electric vehicle control and vehicle autonomy.

Our people are high achievers with a passion for science and technology, a solid technical background and a positive and friendly attitude.

We are looking for a business developer to join our UK team. This person will be working very closely with the founders, involved in networking, developing opportunities, following leads, preparing proposals, negotiations and drafting contracts.

We expect the candidate to have the following traits and experience:

- Degree qualified in Engineering
- Minimum 10 years of automotive engineering experience in the UK
- Sound track record in business development in the UK
- Past involvement in projects developing technologies for EV / BMS or AV / ADAS
- Excellent communication and interpersonal skills
- Willingness to travel in the UK and globally

Eatron offers challenging work and exciting projects, collegial atmosphere, a bright team of engineers to work with, and a chance to build the future of automotive software together.

Please apply with your CV and Cover Letter at www.eatron.com.
